President's Corner by Misty Humphries, MD

The 47th Annual VESS Winter Meeting at Sun Valley was a great meeting this year with increased expansion of programming targeted at vascular trainees and early career vascular surgeons. I am overwhelmed and excited to serve as the Society's 2024-2025 President. Writing this takes me back to many firsts in my life that happened at the winter meeting and the evolution of some of the strongest friendships in my professional career. It was the first place I presented my research, and then a year later, I coached one of my trainees to present our work. The scientific portion of the VESS meeting has always drawn work that pushes where we are as vascular surgeons and questions what the future of our field will look like.

President's Corner continued page 5

VESS 2024 Winter Meeting Highlights

The VESS 2024 Annual Winter Meeting showcased what makes the VESS an amazing group to be a part of! There were wonderful scientific sessions, informative discussions on a variety of topics, lots of camaraderie, and as always lots of great skiing. Thursday kicked off with special sessions for Medical Students, Vascular Fellows, General Surgery Residents and a new program for Early Career Faculty. The scientific sessions offered great presentations on a variety of vascular topics with something new and interesting for everyone.

Special congratulations to our two winners of the Best Paper Competition (we had a tie for the first time ever!). **Dr. David Jiang** from the University of Chicago, for his paper on *Polygenic Score Informed Models Can Improve Screening For Abdominal Aortic Aneurysms* and **Dr. Marissa Jarosinski** from University of Pittsburgh for her talk on *Outpatient Anticoagulation Is Associated With Improved Acute Limb Ischemia Outcomes Following The Advent Of Direct Oral Anticoagulation*. The meeting wrapped up with **Dr. Mark Conrad's** Presidents Dinner and left everyone looking forward to the Spring Meeting at VAM and next years Winter Meeting in Breckenridge, CO.

Roan Glocker, MD, Chair
VESS Winter Program Committee

VESS 2024 Winter Meeting Highlights

VASCULAR FELLOWS PROGRAM

VESS hosted another successful Vascular Fellows Program in 2024. We had 34 applications from senior residents and fellows from around the country and awarded 25 travel scholarships. Participants had the opportunity to present challenging endovascular and open cases, which were followed by spirited discussions. These were interspersed between excellent talks by over 15 invited speakers with topics ranging from *Tips and Tricks to Successful Transitioning to Attending Life to Industry Relationships - Impact on Career and How to Develop/Maintain Them*. The Program included the “Great Practice Debate” which exposed trainees to the top reasons to consider difference practice paradigms. Trainees were thrilled that we offered the ever popular Vascular Jeopardy during the program. We’d like to thank our industry sponsors for their continued support of this important program.

Adam Doyle, MD, Co-Chair
VESS Vascular Trainees Education Committee

NEXT GENERATION STUDENT MENTOR PROGRAM

The VESS hosted the 7th Annual Next Generation Student Mentor Program in Sun Valley, ID. The program was highly sought after by medical students interested in pursuing careers in vascular surgery. We received over 50 applications from medical schools across the United States and its territories. The group of Next Generation Scholars showed up ready to learn and contribute to the discussion. The panel discussions included topics like building a mentor/mentee relationship, a “Day in the Life” of a vascular surgeon, promoting wellness in medical school, the importance of inclusion and diversity within our specialty, what makes a competitive training program applicant. A wide representation of leaders (present and future) in the field of vascular surgery joined the conversation. A group of vascular program directors, residents, and fellows participated in an informative discussion to help these future applicants learn more about the application and interview process. **MD-candidate Lily Adler** presented tips for success to the future vascular surgery

residents and fellows in the room. In the afternoon, the medical students participated in a hands-on session that included both open surgical practice and thoracic and abdominal endovascular simulators. Overall, this was an unforgettable experience with a dynamic and inspirational group of medical students, the future of our specialty. **Dr. Wohlauer** extends his gratitude to the Student Education Committee, Moderators, Panelists, and Next Generation scholars for making this one of the most memorable programs to date!

Max Wohlauer, MD, Chair
VESS Medical Student Education Committee

VESS 2024 Winter Meeting Highlights

GENERAL SURGERY RESIDENT PROGRAM

We hosted the second General Surgery Resident Program at the winter VESS meeting this year in Sun Valley, ID. This program was attended by selected general surgery residents interested in vascular surgery from around the country. This year, we had more applicants than available slots and each attendee was provided a \$1000 travel stipend. Our program included new and previous speakers and panelists, who generously contributed their time and expertise to help our future vascular surgeons achieve their goals. We brought back popular discussions and presentations from last year, including talks on “What makes a competitive fellowship applicant” as well as “Mentorship, Scholarships, and Research Opportunities”. Our interactive panel discussions included a Fellows Panel, with 4 current and recently graduated fellows lending their experience to the group. We also brought back the popular “Great Debate: Academic vs. Private Practice”, which sparked thoughtful and dynamic conversation. One of the most well received topics this year was a new talk on Financial Literacy, which was informative and incredibly useful to our young surgeons. In the afternoon, the residents participated in hands-on simulations of endovascular procedures for AAA and lower extremity revascularization, before participating in the Vascular Technology Forum. Overall, this was an incredible experience with a motivated and invested group of general surgery residents, poised to become the next leaders in our field. I want to thank all of the members of the General Surgery Resident Program committee and our speakers/panelists for making this year’s program outstanding.

Reshma Brahmbhatt, MD, Chair
VESS Vascular Trainees Education Committee

EARLY CAREER SURGEON PROGRAM

This year, VESS introduced the Early Career Surgeons Program, directed towards our younger members who are in their first five years of practice. The content developed was focused on the unique struggles and challenges that the young surgeons face. Topics ranged from developing a practice, understanding personal finances, and partnering with industry. The talks were interactive and the session concluded with a case conference where the participants presented some of their “worst” cases from their early years in practice. The program was a resounding success and we look forward to this program next year. A special thank you to our industry partner, W.L. Gore, for supporting this program. Thanks to their support we were able to offer travel stipends to 25 early career surgeons to attend. We look forward to continuing this program which supports our mission to improve the quality and safety of vascular & endovascular surgical procedures and general vascular care through education, scholarship, advocacy and leadership.

Karan Garg, MD

VASCULAR TECHNOLOGY FORUM

The 2024 VESS Vascular Technology Forum had an unplanned unique twist this year—bad weather and flight delays created an even more intimate event than we have come to expect. We have enjoyed amazing attendance growth over the years, so while its disappointing to have so many miss out on the experience, the disproportionate faculty/industry to participant ratio led to great one on one discussions and the opportunity for a wonderful exchange of ideas for those able to attend. Ethicon provided a juxtaposition to the endovascular technology we more frequently showcase at the tech forum while Cook upped their usual strong showing by running their most advanced simulator to date—the recently unveiled fenestrated simulator! Rounding out the day, Penumbra provided their array of coils and aspiration catheters while Terumo and Silkroad brought their low profile TEVAR and well-established TCAR displays respectively. We are appreciative of our industry sponsors for helping make this event a reality—looking forward to next year’s return!

Matthew Wooster, MD

Reflections from My Experience at the VESS Winter Conference

Daniel Gage, MD

*PGY-3, Department of General Surgery
The Ohio State University*

It was not until my third-year clinical rotations that I found the field of vascular surgery. From the moment I started on service, I was fascinated by the cases I saw and the various surgical problems the field attempted to address. Shortly after my time on service, I sought advice from **Dr. Kristine Orion**, a VESS Member and someone who I now consider a mentor. She recommended that I apply to the VESS New Generation Student Mentor Travel Scholarship Program to support my additional exposure to vascular surgery and work with faculty who have an interest in helping students network to obtain additional information and learning opportunities in the field.

I was fortunate to be selected for the scholarship and excitedly made my way to Steamboat Springs, Colorado to attend the winter conference in late January 2020. This experience offered an organized and exciting, in-depth discussion about the field and surrounded me with other students who had similar interests. All the faculty were invested in us as students, and they attempted to answer all our questions in a thoughtful and honest manner. It was great to hear about the different pathways to vascular surgery, which eventually helped me discover which was best for me. The hands-on workshops were equally exciting and gave me the opportunity to see myself as a future vascular surgeon. The enthusiasm from the attending physicians, as well as other students and trainees, created a great learning environment, and the additional research presentations during the conference allowed me to see work being completed across the country, motivating me to seek ways to contribute myself.

My attendance at the VESS 2020 Annual Winter Meeting and involvement in the VESS New Generation Student Mentor Travel Scholarship Program acted as a springboard to a hopeful future career in vascular surgery, and I am incredibly thankful for the opportunity to meet leaders in the field and gain inspiration to continue being a part of this professional community!

President's Corner continued from page 1

But more than science, VESS is a place to build lifelong friendships and mentorship relationships. It was where I first learned to snowmobile with **Jason Lee** and every year since have gone out with Matt Smeds and his family snowmobiling adding to our group the families of **Dawn Coleman** and **Bernadette Aulivola**. It's where **Caitlin Hicks** and her husband have watched me go the wrong way on the slopes, so I now wear an Airtag making sure someone can keep track of me. Moreover, it is where I have watched new members bring the kids and have some time for both science and family.

While skiing has never been my passion, spending time with other early career vascular surgeons allowed me to connect and check the experiences and challenges I met when I started my career. Was it just me that had block time from midnight to 5 am? How many grants would I be rejected by before I would get one? Has anyone ever seen a case like this crazy case I was about to do in two weeks, for which I was not sure of a definitive plan? Connecting with my colleagues across the United States over these experiences has made me and everyone who attends the VESS meeting the strong surgeons we are today.

The 2024-2025 year is going to be even better for VESS. This winter meeting, we launched an Early Career Faculty experience led by **Karan Garg**, focused on what young surgeons need to know about the business of vascular surgery. This is in addition to the General Surgery Resident Program, the Vascular Fellows' Program and the Next Generation Student Mentor Program. 2024 will also mark the launch of the VESS Research Fellowship under the Leadership of **Liz Genovese**. This 2-year research fellowship will continue to help members and trainees develop groundbreaking research to transform vascular surgery for the years to come. We will get to see some of the work presented at the 48th Annual VESS meeting in Breckenridge, CO so start planning your trip for February 2025. I will see you all there.

VESS Mentorship Program

Overview

Mentorship is one of the most important tools for professional development and has been linked to greater productivity, career advancement, and professional satisfaction.

The VESS Mentorship Program aims to promote career and leadership development for early career vascular surgeons. All Active members of the VESS within 10 years of training or candidate members in their last year of training are encouraged to apply.

Through a one-year young surgeon/leader match, the program will pair early career vascular surgeons with mentors who are more experienced colleagues, to provide opportunities to develop leadership skills and obtain guidance for achieving specific career goals.

Early Career Surgeons will gain a trusted advisor and learn methods to enhance career advancement. They will learn to:

- Develop short-term and long-term growth goals and strategies to achieve those goals
- Identify leadership opportunities within the VESS
- Expand current networks within the specialty

Mentors will act as a guide to help develop the early career surgeon's career, as well as enhance their personal growth and productivity. The mentor will:

- Provide honest and constructive feedback
- Assist the young surgeon on issues such as the establishment of short- and long-term goals, navigation of the advancement/partnership process, and guidance on research and/or teaching activities, etc.
- Offer advice on overall clinical and practice management concerns

How it Works

1. The VESS Diversity, Equity & Inclusion Committee will review all applications and create a match with a leader based on needs and experience and will notify each young surgeon of the arrangement.
2. VESS will monitor the year-long relationship through regular feedback and assessments from both parties to ensure the relationship thrives and is beneficial to both surgeons

Who Is Eligible?

- Applicants must be in the last year of a vascular surgery training program or have completed a training program and have no more than 10 years of practice experience at the time of their application submission.
- Applicants must be Active members or Candidate members of VESS

Time Commitment

- Leaders/young surgeons will be asked to set regular phone meetings, at least once every other month, to discuss young surgeon goals, objectives, and progress
- One-on-one leader/young surgeon in-person meeting at a time convenient for the leader and young surgeon

Application Deadline: MAY 5, 2025

Applications can be found on the VESS website: <https://vesurgery.org/resources/find-a-mentor/>
